PPWR new EU regulation

To whom it may concern,

As of August 12th 2026, the European Regulation (EU) 2025/40 on packaging and packaging waste (PPWR) starts introducing requirements aimed at reducing packaging waste and improving sustainability and circularity throughout the EU.

In preparation for its application, Volvo Group is aligning its operations with the regulation's requirements and hereby informs its suppliers.

Volvo Group is committed to comply with the PPWR and the commitment applies across all Volvo Group brands and legal entities.

As part of this, Volvo Group would like to inform you of the following:

- Suppliers are expected to maintain and, upon request, to provide a Declaration of Conformity demonstrating compliance with the PPWR for all packaging used in deliveries to Volvo Group.
- For single-use packaging bearing the Volvo brand or otherwise identifying Volvo Group as manufacturer, Volvo Group will prepare and implement processes to, upon request from authorities, provide customers with the relevant Declaration of Conformity.

In parallel, Volvo Group is reviewing its packaging standards to further clarify future requirements related to packaging in line with PPWR.
